

SQUASH STRINGS

The UltraNick family of squash strings features a multifilament Zyex core encapsulated with a high tenacity monofilament nylon wear surface

PowerNick® 18

SQUASH STRING

PowerNick® 18 features a monofilament Zyex core encapsulated with a high tenacity monofilament nylon wear surface

MONOFILAMENT
ZYEX® TECHNOLOGY

1.15 mm
DIAMETER
[18 gauge]

9 metres / 30 feet
SET

ZYEX®
TECHNOLOGY

MAIN FEATURES

- Maximum Power
- Maintains Tension

THE BENEFITS

PowerNick 18 is 1.15 mm in diameter for optimum power and resilience. The textured surface and thicker diameter combine to ensure maximum durability and spin performance for the life of the string.

MultiNick® 18

SQUASH STRING

MultiNick® 18 squash string combines high tenacity multifilament nylon filaments with a unique polyurethane resin coating

[MULTIFILAMENT
PU TECHNOLOGY]

1.15 mm
DIAMETER
[18 gauge]

9 / **30**
metres / feet
SET

MNT PU
TECHNOLOGY

MAIN FEATURES

- Multifilament Feel
- Unique PU Coating

THE BENEFITS

MultiNick® 18 is 1.15mm in diameter for superior feel and ability to cut and spin the ball. The polyurethane resin coating provides excellent toughness and durability, as well as offering a soft and powerful string bed.

SQUASH STRINGS

The SuperNick®ZX family of squash strings features a multifilament nylon core encapsulated with a hi-tech ZX wear layer constructed with Zyxex® filaments

SQUASH STRINGS

The SuperNick XL family of squash strings features a multifilament nylon core encapsulated with a high tenacity monofilament nylon wear surface

ASHAWAY®

ZyMax® TX

BADMINTON STRINGS

The ZyMax TX family of badminton strings features a BETA Polymer ZyWeave core encapsulated with a high tenacity BETA polymer wear surface, and then bonded with a proprietary textured coating

TEXTURED COATING
ZyWeave™ CORE TECHNOLOGY

ZyMax® 64 TX

MAIN FEATURES

TEXTURED COATING
MAINTAINS TENSION

REPULSION POWER : 
CONTROL : 
TENSION STABILITY : 
DURABILITY : 

THE BENEFITS

ZyMax 64 TX is a 0.64mm in diameter for optimum power and performance. The BETA Polymer ZyWeave core provides minimal tension loss and the textured coating adds stiffness to the string bed, enhancing both control and spin.

ZyMax® 68 TX

MAIN FEATURES

TEXTURED COATING
MAINTAINS TENSION

REPULSION POWER : 
CONTROL : 
TENSION STABILITY : 
DURABILITY : 

THE BENEFITS

ZyMax 68 TX is a 0.68mm in diameter for optimum power and durability. The BETA Polymer ZyWeave core provides minimal tension loss and the textured coating adds stiffness to the string bed, enhancing both control and spin.

BADMINTON STRINGS

BETA POLYMER ZyWeave™ TECHNOLOGY

The ZyMax Fire family of badminton strings features a BETA Polymer ZyWeaVe core encapsulated with a high tenacity BETA Polymer microfilament wear surface

MAIN FEATURES

ULTIMATE REPULSION MAINTAINS TENSION

REPULSION POWER : 
 CONTROL : 
 TENSION STABILITY : 
 DURABILITY : 

ZyMax 62 Fire is 0.62mm in diameter for optimum combination of shuttle speed and repulsion. The BETA Polymer ZyWeaVe core provides minimal tension loss and maximum strength and durability.

0.62 mm [22 micro gauge]
BETA POLYMER TECHNOLOGY

BADMINTON STRINGS

[BETA POLYMER ZyWeaVe™ TECHNOLOGY]

The ZyMax Fire family of badminton strings features a BETA Polymer ZyWeaVe core encapsulated with a high tenacity BETA Polymer microfilament wear surface

ZyMax® 66 Fire

MAIN FEATURES

[ULTIMATE PRECISION MAINTAINS TENSION]

REPULSION POWER : 
 CONTROL : 
 TENSION STABILITY : 
 DURABILITY : 

THE BENEFITS

ZyMax 66 Fire is 0.66mm in diameter and delivers precise shotmaking and shuttle control. The BETA Polymer ZyWeaVe core provides minimal tension loss and maximum strength and durability.

ZyMax® 66 Fire Power

MAIN FEATURES

[ULTIMATE POWER MAINTAINS TENSION]

REPULSION POWER : 
 CONTROL : 
 TENSION STABILITY : 
 DURABILITY : 

THE BENEFITS

ZyMax 66 Fire Power is 0.66mm in diameter and delivers powerful shot making and shuttle speed. The BETA Polymer ZyWeaVe core provides minimal tension loss and maximum strength and durability.

BADMINTON STRING

The Rally 21 Fire badminton string features a BETA Polymer multifilament core surrounded by a tough nylon monofilament wear layer

**BETA
POLYMER
TECHNOLOGY**

10 metres / 33 feet

SET

Rally 21 Fire is 0.70mm in diameter with a BETA Polymer core. The thinner diameter provides superior playability and shuttle control, while the Beta Polymer construction insures outstanding repulsion power and optimum durability. The Rally 21 Fire performs like a tournament gauge string but has the toughness and power usually associated with a heavier gauge construction.

PowerKill®

RACQUETBALL STRINGS

[POWER FILAMENT TECHNOLOGY]

The PowerKill family of racquetball strings features a multifilament nylon core combined with a revolutionary surface element of Zyex® filaments in the outer string wear layer

PowerKill® 17

MAIN FEATURES

[DURABLE PFT™ DESIGN
SUPERIOR POWER
MAINTAINS TENSION]

POWER : 
CONTROL: 
TENSION STABILITY: 
DURABILITY : 

THE BENEFITS

PowerKill 17 is 1.25mm in diameter with a multifilament nylon core for optimum shear strength and durability combined with a surface element of Zyex filaments to maximize power and tension stability.

This PTF string design is recommended for all types of power players and string breakers to maximize playability and string life.

PowerKill® Pro

MAIN FEATURES

[DURABLE PFT™ DESIGN
OPTIMUM POWER
MAINTAINS TENSION]

POWER : 
CONTROL: 
TENSION STABILITY: 
DURABILITY : 

THE BENEFITS

PowerKill Pro is 1.30mm in diameter with a multifilament nylon core for optimum shear strength and durability combined with a surface element of Zyex filaments to maximize power and tension stability.

This PFT string design is recommended for chronic string breakers that frequently experience premature frame breakage due to a consistently powerful style of play.

RACQUETBALL STRINGS

TENNIS STRINGS

The MonoGut ZX family of tennis strings consists of two gauges of 100% Zyex monofilament string that provide the power and comfort of natural gut string at less than half the cost.

GUT-LIKE PLAYABILITY
SUPERIOR DURABILITY
EXCEPTIONAL DYNAMIC STIFFNESS
NO POLYESTER ADDITIVES

MonoGut ZX Pro is a 1.22mm string that has the power and comfort of natural gut at less than half the cost. The absence of polyester increases elongation and decreases stiffness in a very resilient monofilament string.

HYBRID TECHNOLOGY

The Crossfire family of tennis strings features a tough, durable braided Aramid main string combined with a Synthetic Gut cross string

**HYBRID
TECHNOLOGY**

7/6 metres / 23/20 feet
SET

MAIN FEATURES

- Powerful Playability
- Softer Feel
- Superior Spin Capability
- Maximum Durability

THE BENEFITS

- ▶ PTFE filaments in braided Aramid main string produce softer feel to enhance playability of powerful Aramid filaments
- ▶ 1.25 mm braided Aramid / PTFE main strings enhance string abrasion resistance and increase string life
- ▶ Synthetic Gut cross strings provide superior resilience and ball control
- ▶ Crossfire +Plus hybrid combination maximizes both playability and string life for chronic string breakers

TENNIS STRINGS

The Crossfire ZX family of hybrid tennis strings features a tough, durable main string combined with a soft, powerful MonoGut ZX 100% Zyxex® monofilament cross string

EXCEPTIONAL SOFT POWER
EXCELLENT DURABILITY
SUPERIOR SPIN

DURABILITY :

Crossfire ZX is a 1.22/1.25mm hybrid string that combines braided Aramid/PTFE main strings for excellent abrasion resistance and string life with MonoGut ZX Pro 100% Zyx monofilament cross strings for gut-like playability and superior spin.

This hybrid combination provides exceptional soft power, crisp playability and enhanced string life for top spin players that experience frequent string breakage.
