

ASHAWAY®

Kevlar® + Plus

TENNIS STRING

[HYBRID TECHNOLOGY]

Ashaway's family of braided Kevlar strings is used to maximize durability in hybrid string combinations

1.25 mm
DIAMETER
[17 gauge]

HYBRID
TECHNOLOGY

110 metres / 360 feet
SMALL REEL

220 metres / 720 feet
LARGE REEL

MAIN FEATURES

- Powerful Playability
- Softer Feel
- Maximum Durability
- Excellent in Hybrid Combinations

Kevlar® is a registered trademark of E.I. DuPont de Nemours & Co., Inc.

THE BENEFITS

- PTFE filaments in braided Kevlar main string produce softer feel to enhance playability of powerful Kevlar filaments
- Braided Kevlar / PTFE main strings enhance string abrasion resistance and increase string life
- Bulk reels allow creation of hybrid combinations suitable for all racket types and string patterns
- Minimum string waste when using bulk reel packaging
